

# MULTIPLE APPLICATIONS

---

First-time entering students may apply to and be admitted to only one clinical program or PhD program at a time. Multiple college or program applications will not be accepted or processed. Participation in the dual degree option is the only exception.

Enrolled students in the final year of their respective programs who anticipate completion of a DMU degree may apply for admission to another University program. If admitted, students are expected to complete the full curriculum in which they are currently enrolled. Students enrolled in a DMU program may not transfer to another program. In order to be considered for admission to another program, students must first withdraw from their current program and complete the application process for the other program.
